

Full stack engineer with nine years of production experience across web, mobile, backend services and DevOps, mostly in TypeScript. Nearly seven of those years were spent building blockchain products at Kysen, and since 2018 I have run my own studio, Cyants, delivering client apps and products of our own.

EXPERIENCE

Miroma Project Factory · Software Engineer Jun 2026 – present · Sep 2020 – Apr 2022

- Building Stage 3 of Pave, Cancer Institute NSW's quit-vaping app for young people, across the Expo mobile app and a NestJS backend on Azure Functions.
 - Built most of Liv, a React Native app that supports people living with dementia and their carers, and its Angular admin portal.
- React Native · Expo · NestJS · Azure · Firebase · Angular

Tokenyze · Frontend Engineer Jun 2024 – Jun 2026

- Built the agent dashboard for Tokenyze's tokenised gold platform, which agents use to handle compliance on gold trades.

Kysen Technologies · Software Engineer · PoS validators and products for blockchain teams Oct 2019 – May 2026

- Built the React frontend for Cosmos Outpost, an analytics site for the Cosmos ecosystem.
- Built Harvest, a Flutter mobile wallet on Terra for earning yield on stablecoin deposits and swapping between stablecoins.
- Worked on Mirror Wallet, a mobile wallet for trading tokenised US stocks on Mirror Protocol.

React · Flutter · Dart · Cosmos · Terra

Cyants · Founder · Software studio for client builds and our own products Jun 2018 – present

- NextRare, 2025–2026. Built features across its iOS and Android app for collectible card packs, including pack reveals, missions, a loyalty points system, and crypto deposits and withdrawals on Base and Solana, plus the backend APIs for rewards and pack odds.
 - Asterix and Amaterasu, 2024–2025. Sole developer of seven web apps for Asterix, a DN404 hybrid token and NFT project on Ethereum, covering staking, vesting, a quest platform and NFT rerolls. Then launched Amaterasu, a hybrid NFT collection on Aptos, including its Move smart contracts.
 - Our own JRNY apps for travellers and group scheduling, and client builds through agencies and Upwork since 2018.
- Expo · React Native · Next.js · Drizzle · Postgres · Privy · wagmi · viem · Move · TanStack Start · Convex

Mercury Labs · Software Engineer, remote · Real-world asset tokenisation Jul 2022 – Sep 2023

- Built a Hedera dashboard that lets suppliers issue their own asset tokens, with multisig treasury accounts and token metadata on IPFS. The firm's first product tokenised wine.

atticc · Software Engineer, remote Jul 2022 – Sep 2023

- Built most of the web app for a web3 social network, including profiles and follows on CyberConnect, wallet-to-wallet chat over XMTP, token-gated communities, peer-to-peer NFT trading and an NFT membership pass.

TBSx3 · Senior Software Engineer, Penang Jul 2017 – Apr 2018

- Led the Penang engineering team, including hiring and project management, for a blockchain-based anti-counterfeiting product. Built its API services for the web dashboard and mobile app, and set up GitLab CI/CD deploying to AWS, Rancher and Firebase.

Earlier 2015 – 2017

- Lava X Technologies, Full Stack Developer, 2017. Led a team that built client MVPs in six weeks. Tableapp, iOS Developer intern, 2015.

SKILLS

Languages	TypeScript, JavaScript, Dart, Swift, Solidity, Move
Web, mobile	React, Next.js, TanStack, Tailwind CSS, three.js · React Native, Expo, Flutter, iOS
Backend	Node.js, NestJS, PostgreSQL, Drizzle ORM, Convex, Cloudflare Workers and D1
Web3	Cosmos, Terra, Ethereum, Base, Aptos, Solana, Hedera, wagmi and viem
DevOps	GitHub Actions, GitLab CI, Docker, AWS, Azure, Firebase, Cloudflare, Playwright

EDUCATION

- Bachelor of Computer Science, Digital System Security. University of Wollongong, 2016
- CPEH ethical hacking certification

LANGUAGES

- English, Chinese: native
- Cantonese, Malay: limited working
- Japanese: elementary

COMMUNITY AND OPEN SOURCE

- Organised the JavaScript Malaysia meetup in Penang and gave talks there and at Docker Penang
- Merged fixes in React, TanStack Query, Aptos Core, Ghost and Harmony's 1wallet
